Languages

- Italian (Native)
- Chinese (Native)
- English (Fluent)

Experience

Takyon (now dAlrect) - CTO (06/2025 - present)

- Built [dairrect.io](#), a platform that tracks how hotel websites are surfaced in AI assistants and how content is interpreted by LLMs.
- Designed and built backend services and REST APIs to collect, process, and expose this data.
- Built frontend dashboards to visualize performance and changes, focusing on clarity and usability.
- Implemented a script integration to modify website content and improve results in AI assistants.
- Led a team of 4 engineers. Hired and worked directly with them while contributing to the codebase.

Ninfa - Co-founder and CTO (03/2022 - 06/2025)

- Built [ninfa.io](#). Curated NFT art marketplace.
- Reached 50k+ users and over \$1M in volume.
- Built backend, APIs, and frontend using Next.js and cloud infrastructure.
- Led a team of 5 engineers. Shipped features continuously.

Indie App Developer (01/2020 - 03/2022)

- Built and published mobile apps on iOS and Android. 1k+ downloads.

Education

Politecnico di Milano (2017 - 2020)

- Bachelor's degree in Computer Science

Misc
